

SMART Board™ 6052i interactive display

Dual touch

This SMART Board interactive whiteboard is also available in a dual-touch model. With a dual-touch SMART Board interactive whiteboard, teachers can switch seamlessly between single and dual-user mode in SMART Notebook™ collaborative learning software. When in dual-user mode, the interactive whiteboard has two separate work spaces, enabling two students to touch or write simultaneously on it.

The SMART Board 6052i interactive display is a touch-enabled LCD display designed for educational spaces where an integrated projector isn't suitable or desirable. The 6052i combines a professional-grade LCD display with SMART's DVIT™ (Digital Vision Touch) technology to give you a large, high-quality display.

More Freedom in your classroom

The widescreen, touch-enabled surface of the 6052i allows you to write in digital ink with your finger or a pen, use touch gestures to interact with applications and save your lesson notes. This projector-free system also supports HD and eliminates shadows, improving both the visibility and impact of your lessons. The 6052i comes with SMART Notebook collaborative learning software which helps you create, deliver and manage high-impact interactive lessons.

Create more flexibility

Whether writing with a pen, erasing with a palm or moving objects with a finger, the 6052i has all the functionality of an interactive whiteboard. Teachers can easily add multimedia devices, such as document cameras, DVD players and laptops. And because it's an integrated system, it's easy to control and manage all your classroom technology from one source.

Install and maintain easily

This interactive display features a one-piece, integrated design, so you can install it quickly and easily – right out of the box. And because the 6052i doesn't require projector bulbs or filters, you'll spend less time managing and supporting it.

- 1 Widescreen SMART Board interactive display – Enjoy the touch-sensitive interactive display in a 16:9 aspect ratio.
- 2 High-definition, professional-grade LCD panel – Experience high-definition (1080p) resolution with the 6052i.

Key features

Simple installation

Install the 6052i right out of the box. With an integrated one-piece design, the 6052i is easy and cost-effective to install. Simply mount the interactive display and connect it to a computer or GoWire and the 6052i is ready to use.

Touch system

You can write with a pen, erase with your palm and move objects with your finger without having to put the pen down to access other tools. The SMART Board interactive display automatically switches modes for you.

Touch gestures

Navigate through applications using your fingers to perform common touch gestures, such as scaling, scrolling, transitioning between pages, right clicking, rotating and erasing. Enabled by DViT technology, touch gestures are supported in SMART Notebook collaborative learning software and all Microsoft Windows® applications.

Comes with SMART Notebook software

The 600i comes with award-winning SMART Notebook software.

Space-saving system

Incorporate the 6052i into most meeting room environments. The interactive display features a space-saving design that creates a small footprint.

Low total cost of ownership

Minimize your usage costs and eliminate the need for regular maintenance. The 6052i doesn't require projector bulbs or filters, and has a long life, even with constant use.

Warranty

Get a two-year warranty on the SMART Board 6052i interactive display.
